FOR THE BODY AND THE MIND

SOFTUB

THE MOST PORTABLE HOT TUB IN THE WORLD

Softubs are light, portable, comfortable and environmentally friendly. Whether inside or outdoors, a Softub can change your favourite place into an oasis of relaxation!

These mobile wellness miracle machines are characterised by their excellent weather resistance, thermal insulation and light weight. The outer casings are made from ‘LeatherTex’ – a material which lends a leather look to the traditional hot tub elegance. The inner basins are made from Polybond – a high-insulating foam material which offers both first-rate structural stability and excellent comfort levels for all sitting and lying down positions.

Softubs are especially renowned for setting standards in energy efficiency and quiet running volumes. The portable spas work with environmentally- friendly and energy-saving technologies: clever arrangement of the motor, pump and heating system, for example, ensures that most of the heat required to achieve your perfect water temperature is actually recovered from the hot tub’s general operating cycle. In combination with the effective Whisper™ motor technology, this means that all Softub hot tubs’energy requirements are kept to a minimum. Best of all, though: the hot tubs run so quietly that you’ll never have any problems if you and your fellow-bathers choose to converse in whispers.

EIGHT REASONS FOR SOFTUB

1. PORTABLE

Light, easy to use and easy to Install; with Softub, The most portable Hot Tubs in the world, you never need to be limited to one location.

3. ENERGY EFFICIENT

Softub lead the market in Heat Recovery Technology, incorporating the Pump, Motor and Heating into a single Hydromate Unit, the excess heat from the motor is used to heat the filtrated water, keeping energy consumption down to a minimum.

2. QUIET

Enjoy relaxing in beautiful tranquillity. Thanks to their “Whisper” technology, Softub Hot Tubs are among the quietest in the world.

4. WEATHER RESISTANT

No matter what the weather, Sun, Rain, Frost or Snow, Softub Hot Tubs robust LeatherTex outer casing has been created for long life, with added benefits of hard wearing effective colours and total durability.

5. HYGIENIC

The automatic Softub Ozonator function provides an intensive water cleaning program. As a result, every bath will take place in clean, high-quality water!

6. FLEXIBLE

For ultimate flexibility, every Softubs basin shape is designed to allow easy rolling movements for position changing – and an endless number of sitting and lying position possibilities.

7. COMFORTABLE

Softubs are unsurpassed for comfort and convenience! The soft but stable form of the Polybond interiors provide comfort in all positions – making the pool as comfortable as a leather sofa.

8. STYLISH

Leather-look, border edging, modern exterior colours and practical, stylish accessories: Softub convinces with its high-quality, chic designs.

WELLNESS
OASIS

HOT TUB

WELLNESS

With regular use, Softub can bring more vitality into your life. The warm water massage encourages blood circulation and can activate the body's own natural healing powers. Massage doesn't just relieve tension – it also helps in the recovery process for stressed body parts. A Softub bath helps to release endorphins, naturally reduces pain, and encourages feelings of happiness.

The heat increases the body temperature, allowing blood vessels to expand and so absorb more oxygen. More generally, sessions help to keep the skin's blood vessels and the connective tissues elastic and healthy. Particular physical advantages to submerging the body in water are highlighted when total body weight is reduced by approximately 30%. The apparent weightlessness can also be used as treatment against chronic and rheumatic diseases alleviating pressure on joints and soothing sort muscles.

Metabolism can be stimulated and can improve general health. Softub sessions can be recommended for non-physical conditions such as insomnia, for total body relaxation and a good night's sleep.

FOR THE SAKE OF
YOUR HEALTH

BODY & SOUL

Depending on the focus of the individually adjustable massage jets, your Softub Hot Tub can provide effective hydrotherapy – preventing future and assisting pre-existing physical ailments.

Targeted applications can be used to improve ailments, such as:

THROAT / NECK/ SHOULDER AREA

- Effective against neck problems and shoulder tension
- Helps with shoulder traumas
- Acts against tension headaches

LYMPHATIC DRAINAGE/ RHEUMATISM /ARTHRITIS

- Has a stimulating effect on the skin and under skin areas
- Effective at treating swellings, dislocations, strains, sprains and muscle tears
- Uses hot water and massage to relieve pain

LOWER BACK/ SCIATICA

- Effective against sciatica
- Effective at treating problems with bending down
- Prevents irritation of the sciatic nerve
- Effective at treating herniated discs
- Relieves the pain of slipped discs

SACRAL BONE/ COCCYX/ HIPS/ LOINS

- Effective against lower back pains
- Helps with painful Spondylolisthesis

MORE THAN JUST A HOT TUB

Spending more time with family and friends is a resolution that's often cut short by a lack of time and or ideas. Softub socialising, relax, take it easy, no planning, no stress, enjoy from the comfort of your own home.

Forget the overcrowded swimming pools, the expensive entrance fees, the forgotten towels. Softub Hot Tub is an ideal meeting place for all the family; an ideal place for fun and laughter, any time, any day, any weather.

A PARADISE
FOR CHILDREN, TOO

THE ECO HOT TUB

HYDROMATE

The 'Hydromate' a pod that contains the units pump, motor and heating system. Thanks to the clever arrangement of these technical components, Softubs water can also be heated by the motor's excess heat. This environmentally-friendly process reduces power consumption to about 1 k/h – less than a microwave needs to heat a meal.

OZONATOR

The Softubs Ozonator filters the pool water automatically twice every day. Oxidation occurs from the filtration. The resultant water isn't just hygienically clean – it's crystal clear. The need to add chemicals is greatly reduced and general maintenance minimised. A replaceable cartridge filter further adds to each Softubs standards of cleanliness

WHISPER-TECHNOLOGY

A Whisper motor works in a totally different way from previous models: it optimises running and re-use of generated heat. This virtually silent motor keeps energy consumption to a minimum. Softub Hot Tubs are really the quietest in the world!

SMARTCHIP

Intelligent technology: with the Smartchip, Softub hot tubs overcome any issues which might arise from network-associated voltage fluctuations. If the chip registers a surge, all electronic components within the hot tub get automatically switched off. This protects the equipment from all the risks associated with power failure.

JUST TO FEEL GOOD

RELAXATION

AT THE TOUCH OF A BUTTON

LEDS

Underwater LED's are integrated into the Softub allowing you to create an atmosphere that suit your requirements: whether you choose a warm orange, a nautical blue, a vitalising green or a stimulating gradient, Softub LED Lighting offers the individual lighting to suit any mood.

CONTROL PANEL

The simplistic control panel allows you to set the water temperature, jet intensity and light effects. With a water-tight and user-friendly control panel, all of the

hot tub's functions can be very simply turned both on or off.

HYDROJETS

Hydrojets are specialised massage jets, activated on the control panel by a separate switch, allowing you to precisely define the intensity of the massage and the body part which you wish to target. This guarantees you a massage which is exactly tailored to your individual massage needs.

REASSURINGLY SECURE

THERMO-COVER

Even when not in use, your Softub will stay secure and energy-efficient. A special cover protects the unused hot tub from detritus and pollution. The cover's excellent thermal insulation also prevents heat and fluid loss: the water temperature will only decrease slightly, and any condensation will go straight back into the pool.

SECURITY SEAL

To prevent unauthorised usage, Softub have developed a system with four locking points: when not in use, strong straps with safety clips will keep the pool closed. It can then also be locked with a customisable code.

WEATHER-RESISTANT & COMFORTABLE

POLYBOND®

The interior of Softub is made from Polybond. Originally developed for furnishing space capsules, the material is characterised by its excellent thermal insulation and low weight. Polybond also offers great structural stability but still remains soft – offering comfortable sitting and lying-down positions across the hot tub.

LEATHERTEX®

The outer casing of Softub is made from LeatherTex – a material sourced from premium yacht construction and so noted for its great durability and weather resistance. It easily withstands UV radiation, heat and long periods of frost. The elegant leather look also adds a touch of style to any room or garden.

Softub®

IMPRESSIONS

BATHE BETWEEN ICE AND SNOW

Scandinavia sets trends: whether in snow or ice, cold rain or frost, bathing in a warm outdoor hot tub while it's below zero outside is a truly sensory experience. Take advantage of the winter months to enjoy relaxing hours in warm water in the middle of a white winter landscape.

ANY TIME, ANY PLACE

Whether in the garden or on the terrace, whether in spring, summer, autumn or winter, Softub offers you the possibility of relaxing right there and then in the manner you see best. Whether you're an indoors or outdoors type, enjoy the freedom that Softub gives you.

THE FEELING OF LUXURY

Hot tubs are one of the ultimate luxuries. They're private islands – taking you and your wellness program into a magical world of pleasure and joy. Whether you'd like historic walls, an elegant villa or a beautiful apartment in the middle of a bustling city, with Softub you can turn and space into the place of your dreams.

DISCOVER NEW
**FAVOURITE
PLACES**

BUILD IN THREE STEPS

1. LOCATION

Your Softub will be safely delivered to you, and rolled directly to your favourite place.

2. CONSTRUCTION

When the pool and Hydromat are in the desired location, the two sections are placed together and joined.

3. STARTING UP

Connect to a standard household socket, secure the thermal lid to prevent against contamination/unauthorised access during the warm-up period.

Then just dive in and enjoy your oasis of relaxation.

THE COMPANY

QUALITY FOR MORE THAN 25 YEARS

Softub was founded in 1981 by Tom Thornbury in Los Angeles, California. Production of Softub hot tubs is done exclusively in the US (with factories in California and Massachusetts), with all finished products subjected to strict international quality controls. Export occurs via a global distribution network. Softub have more than 35 International Distributors and more than 500 qualified Worldwide Dealerships, delivering orders and Installations to Softub customers.

SAFETY- TESTED

CE & TÜV/GS

After successfully passing all relevant EU standards compliance tests, exported Softub hot tubs (240 volt, 50 Hz) have been awarded a CE certificate. The spas have also been awarded an ANSI/NSPI-6 1999 rating: the 'American National Standard for Portable Spas'. The Softub exhaust system is also ANSI/APSP-7 compliant. The entire system is, of course, also fully TÜV/GS-tested – your guarantee for maximum safety.
